

Deploy the CAST web applications

This documentation page is part of a legacy method of installing CAST AIP. This documentation is no longer maintained and may contain obsolete information. Refer to [Configure CAST Dashboards - new customers](#) or [Configure CAST Dashboards - existing customers](#).

On this page:

- [CAST AIC Portal](#)
- [Health Dashboard](#)
- [Engineering Dashboard](#)
- [CAST RestAPI](#)
- [Legacy CAST Engineering Dashboard/CAST Discovery Portal](#)

Target audience:

CAST AI Administrators

Summary: This section describes how to deploy and configure the **CAST web applications**. This equates to the deployment and configuration of:

- the **CAST AIC Portal** - supports the delivery of the application source code by the Delivery Manager(s)
- the **Health Dashboard** - used for high level investigation of aggregated data generated during the analysis/snapshot generation process
- the **Engineering Dashboard** - used for detailed investigation of the data generated during the analysis/snapshot generation process
- the **CAST RestAPI** - a RestAPI interface to access the data produced during the analysis/snapshot generation process
- the legacy **CAST Engineering Dashboard** and the **CAST Discovery Portal** (license dependent and therefore optional)

CAST AIC Portal

CAST RestAPI

[Installing and configuring the CAST-RestAPI.war](#)

Legacy CAST Engineering Dashboard/CAST Discovery Portal

- **CAST Engineering Dashboard** > provides the drilldown capability from the Health Dashboard into the underlying CAST AIP schemas. This includes full view of all violations, explanation of each violation, source code location, all related violations etc.
- **CAST Discovery Portal** > a web interface designed to provide access to the technical information resulting from a source code analysis.

Note that the installation of the CAST Engineering Dashboard/CAST Discovery Portal is license dependent and is therefore optional.

Please see [Installing and configuring the legacy CAST Engineering Dashboard and Discovery Portal](#) for more information.
