

Quality Configuration

This documentation is no longer maintained and may contain obsolete information. You should instead refer to [Application onboarding](#).

Child pages:

- [Architecture Model configuration](#)
- [Enable User Input Security checks](#)
- [Fine tuning the Assessment Model](#)

If you are looking for data on Application Quality, you may want to consider configuring the following items before [generating the snapshot](#). These tasks are **optional** and if you are only looking for Function Point data or Application documentation using CAST Enlighten then they are not necessary.
