

# Installation process

First obtain the installation media, then choose the installation option as described below. When the installation is complete, access AIP Console using the following URL (ensure you specify the correct **server** and **port number**): `http://<server>:8081/ui/index.html`.

---

## Get the installation media

Where to obtain the **installation media** files.

---

## New customer installation

If you are a **new CAST customer** or if you are standing up **entirely new hardware** specifically to onboard a **new Application**, you can perform a **New customer installation**.

---

## Existing customer installation

If you are an **existing CAST customer** already using legacy CAST AIP and you are planning a transition to AIP Console to onboard a **new Application** or **import an existing Application**, you can re-purpose your existing legacy CAST AIP deployment and perform an **Existing customer installation**.
