- PF_IGNORED_SNAPSHOTS

New features

- **Portfolio template** > Report Generator can now generate documents on a set of applications linked to the CAST Application Analytics Dashboard (requirement to use REST API linked to a Measurement Service database). The set of applications can be all applications available in the CAST Application Analytics Dashboard or a limited scope based on tag and category. Templates are specific and based on a first list of components available in PowerPoint and Word only.

Resolved issues

Description
Rounded off values taken into account during calculation
TOP_NON_CRITICAL_VIOLATIONS_EVOLUTION table is showing wrong N/A values
Violation statistics per file should not be equal to -1 for ABAP analysis
Block HF_BY_MODULE is empty after report generation
While generating reports (doc file and ppt file), under topic Technical debt, somewhere currency is shown in dollar and at same place with euro sign. The issue is in both templates (doc as well as ppt) report template.
VIOLATION STATISTICS per file is shown as -1 for reports which involves ABAP technology
500 Internal server error occurred when executing command lines
No more empty tables with Office 2016
