

Configuration Best Practices

These framework specific analysis configuration documents are guides based on CAST's field experience on how to configure applications based on these frameworks using CAST AIP.

They would be used during the "Configuration" stage as explained for AIP 8.2.x here <https://doc.castsoftware.com/display/DOC82/Process+Overview#ProcessOverview-Theon-boardingprocessindetails> or during the "eBlueprint" stage as explained for AIP 8.3.x (if they are applicable) here <https://doc.castsoftware.com/display/DOC83/Onboarding+an+Application+in+CAST+AIP>.
