1.26.0-funcrel	<ul style="list-style-type: none">• Support for ISO-5055 extension• ISO report names are added and OMG report names are removed• APR provides the number of occurrences during which the violation of a rule takes place• In Technical Debt (OMG), the Adjustment Factor value are now set to two decimal places• Release version is given in the home page• Contains customer bug fixes	

1.26.1-funcrel

Other Updates

Internal Id	Details
DASHBOARDS-3454	Correction to fix an issue where the dashboard is not working in IE11.

1.26.0-funcrel

New Features

Summary	Details
Support for ISO-5055 Metrics in Dashboards	The ISO-5055-Security metric tile is now available, by default, in Dashboards with full functionality support.
GUI - Adjustment Factor	The "Adjustment Factor" column in the "Technical Debt (OMG)" table now displays the value using two decimal places.

Feature Improvements

Summary	Details
OMG efforts in APR	Action Plan Recommendation (APR) now uses the OMG specified/modified efforts in its calculation. One more column called "Occurrences" is added, it displays the number of occurrences of a violation.

Other Updates

Internal Id	Details
DASHBOARDS-3226	Exclusion View: Tooltip should be disabled in background, when dialog box is open
DASHBOARDS-3366	Multiple API hits in the Active/Scheduled exclusions view
DASHBOARDS-3388	APR: Criteria and rules are always displaying from AIP assessment model when you change the health measure from industry standards AM
DASHBOARDS-3327	The Dashboard build number has been removed from the footer.
DASHBOARDS-3427	Unable to navigate to violations table from Rules in Risk Investigation view.
