

2.3. Analysis Automation

CAST provides command line options for both parts of the Analysis Process:

- source code delivery
- analysis execution

Delivery automation

The following video provides an overview of the **Command Line Interface (CLI)** for the CAST Delivery Manager Tool.

You can also find more information about this in the CAST Delivery Manager Tool help (tap F1 in the DMT to load the help).

Analysis execution

The CAST Management Studio has a built-in **Command Line Interface (CLI)** offering the following commands:

- Import
- Export
- RunAnalysis
- GenerateSnapshot
- DeleteSnapshot
- PrepareSnapshot
- GenerateHSQRreport
- SetAsCurrentVersion
- AutomateDelivery
- AcceptDelivery

You can also find more information about this in the CAST Management Studio help (tap F1 in CMS to load the help).
