

Using the CAST-Connection-Profile-Configuration.py file

- [Introduction](#)
- [Syntax](#)
- [Parameter definition](#)

 Available in AIP Core **8.3.37**.

Introduction

The file **CAST-Connection-Profile-Configuration.py** has been made available to allow you to manually create an entry in a **cast-ms.connectionProfiles.pmx** file. The file is available in the following location:

```
<AIP_Core_installation_location>\Tools\ConnectionProfile\CAST-Connection-Profile-Configuration.py
```

It should be executed via the command line or in a batch script using the **python.exe** provided in AIP Core here:

```
<AIP_Core_installation_location>\ThirdParty\Python34\python.exe
```

Syntax

```
python.exe CAST-Connection-Profile-Configuration.py --filepath my_connectionprofile_filename_with_path --host my_css_postgres_host --port my_css_postgres_port --database my_css_postgres_database --user my_css_postgres_user --cryptedpassword my_crypted_password --schema my_mngt_schema_name
```

Parameter definition

--filepath FILEPATH	cast-ms.connectionProfiles.pmx file path, i.e. "%APPDATA%\Cast\Cast\8.3" (default: None).
--schema SCHEMA	Management Schema name (default: None).
--user USER	Username used to connect to CSS/PostgreSQL server (default: operator).
--host HOST	Host for CSS/PostgreSQL server (default: localhost)
--port PORT	Port for CSS/PostgreSQL server (default: 2282)
--database DATABASE	CSS/PostgreSQL database name (default: postgres)
--cryptedpassword CRYPTEDPASSWORD	Crypt password used to connect to CSS/PostgreSQL server for the user specified in --user. (default: CRYPTED2: 90B1A6EC1618661401B724DB5AC34595 which corresponds to CastAIP)
