DASHBOARDS-2468	-	Change Action plan default order to Last updated	1.17

Updates

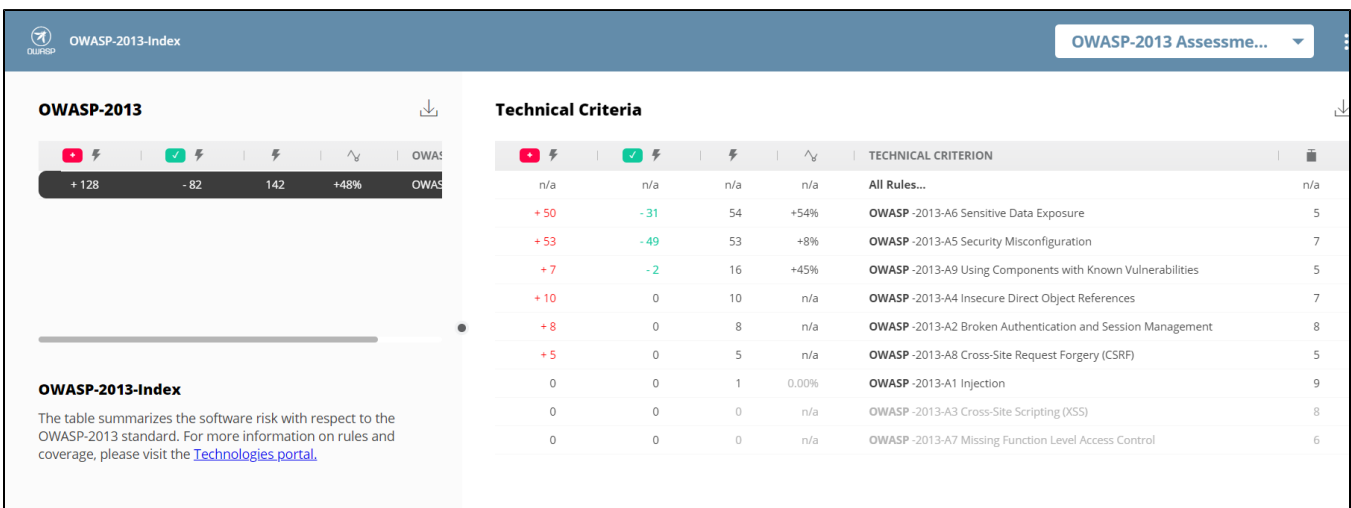

Support of OWASP 2013 and OWASP 2017 Assessment Models

In the [Risk investigation view](#), when the [OWASP](#) Industry Standards extension is installed, the Assessment Model drop down will now show the OWASP 2013 Assessment Model and OWASP 2017 Model (along with CISQ, MIPS, OMG-ASCQM Assessment Models that were introduced in [1.18](#)), as shown below:

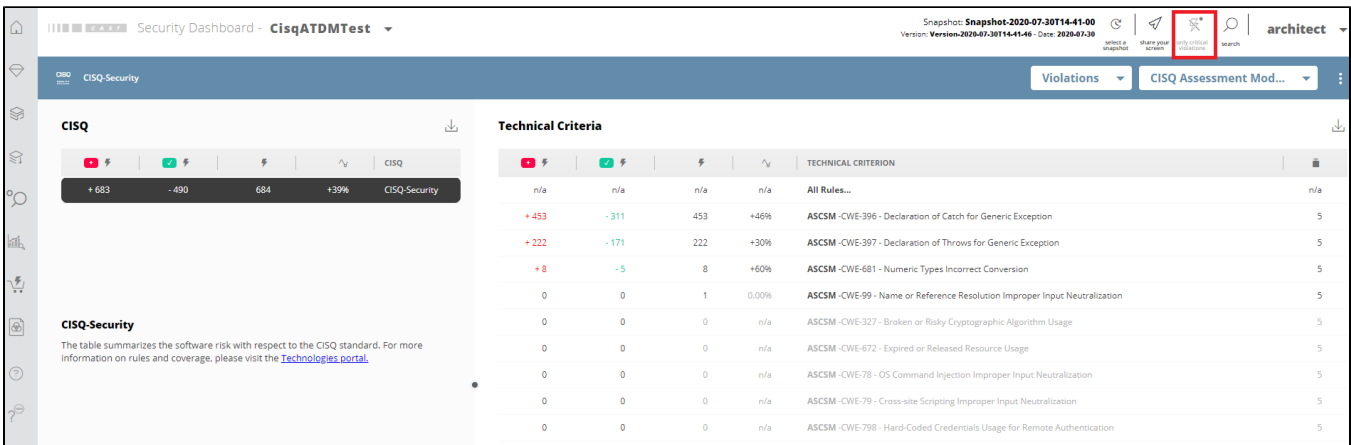

Below screen is displayed when OWASP 2013 Assessment Model selected:

Critical filter is now disabled in the Risk Investigation view for Industry Standards Assessment Models

The critical filter will be disabled and non-critical violation information will be displayed in the Risk Investigation view when you switch the Assessment Model from AIP Assessment model to any of the Industry Standards Assessment Models (such as: CISQ Assessment Model, MIPS Reduction Assessment Model, OMG and so on):

Updates on Architecture Model View

Architecture Model, interactive graphical representation of the violation of the model, has been updated.

On clicking on the red link, you will navigate to the violations section. Also, you have the following options in the architecture model view:

Icon	Description
	Fullscreen - This will allow you to see the entire graph in fullscreen mode
	Recenter - This will allow you to auto recenter the graph and go back to the original state.
	Zoom in - This will allow you to zoom in the view
	Zoom out - This will allow you to zoom out the view
