

Download an extension using AIP Console

CAST AIP Console has been designed to **fully automate** the management of extensions of analysis with CAST AIP. You can find out more in [Application - Extensions](#).

Click to enlarge

The screenshot displays the 'Extensions' management interface in the CAST AIP Console. At the top, there are tabs for 'INCLUDED' and 'AVAILABLE'. A sidebar on the left contains navigation icons for Details, Inventory, Versions, Extensions, Config, Transactions, Function Points, Security Dataflow, and Extensions. The main content area features a large blue header with '19 Extensions' and a search bar. Below this, there are 'Quick Filters' for 'Discovered' (6), 'Force Installed' (0), and 'Updates' (0). The 'Application Version' is set to 'Version-2019-10-16T16-34-42'. Three extension cards are shown, each with a 'Product' button, a description, a 'Read More' link, and a version dropdown menu with a trash icon.

Extension Name	Product	Discovered	Force Installed	Updates
.NET Analyzer	Product	6	0	0
ASP analyzer	Product	6	0	0
ASP.NET Web API Framework an...	Product	6	0	0
