

How to publish documentation for CAST User Community extensions

Summary: Any CAST User Community extension (i.e. a custom extension) requires documentation that is freely available on the internet. CAST highly recommends creating the documentation within the **GitHub repository** you are using for the source code. This page describes the steps required to publish documentation in GitHub.

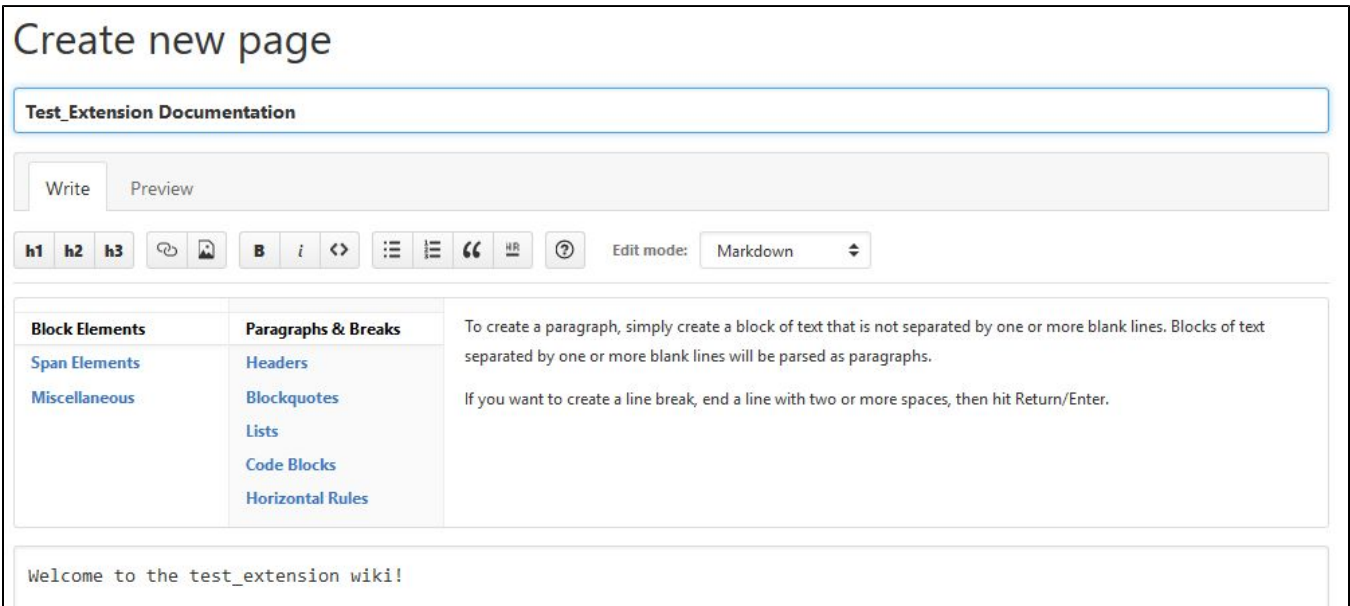

- In the **GitHub repository** (see [Prerequisites and top-tips for creating a custom extension](#) for more information about this) you are using to store the custom extension's source code, click the **Wiki** tab:

- Create a **new page** that will contain the extension documentation:

- Change the title of the page:

- Now enter the documentation, using the CAST-Extend template as inspiration: <https://github.com/CAST-Extend/Template/wiki/Your-Extension-Documentation>:

CAST-Extend / **Template** Unwatch 1 ★ Star 0 Fork 0
