

PHP 1.2

This is the documentation for the CAST AIP extension **PHP 1.2** and all subsequent Service Pack releases (1.2.x).

"Official" CAST AIP Extensions are provided by CAST and are installed on top of CAST AIP to provide support for specific technologies (analysis /measurement/discovery) that are not supported "out-of-the-box" by CAST AIP. These "official" extensions have their own product life-cycle for development, testing and shipping, which is independent from CAST AIP. Please also see <http://doc.castsoftware.com/display/EXTEND/What+are+extensions> for more information.
