

SAP ABAP Discoverer

The SAP/ABAP Discoverer is not currently provided as an extension: instead it is embedded in CAST AIP and is therefore present "out of the box".

SAP /ABAP project

Configures **one project** for the highest level folder (within the root folder) containing files that use the **.ABAP file** extension. Starting 8.3.35, if multiple SAP extractions are delivered, **one project will be created for each SAP extraction** within the delivered source code.

This corresponds to the following option in the CAST Delivery Manager Tool:

Click to enlarge

▼ Which project should we take into account for the analysis?
In this configuration section, you can filter the list of projects that are discovered.
By default all projects found are included.

▼ Type of projects to discover in the package
Specify the project types that the CAST Delivery Manager Tool will discover.
This is particularly useful for situations where your Source Code contains multiple project types.

◆ Project types discovered

- Mainframe project
- SAP project**
- XML scanner
- Visual Basic.NET project
- Visual C# project
- ASP.Net Web Site
- Visual Basic 6 project
- ASP
- Visual C++ 2002-2008 project
- Visual C++ 2010-2012 project
- Eclipse Java project
- Maven Java project
- Web JSP
- Eclipse no nature project
- HTML5 project
- Power Builder project

Notes:

- The following are discovered:
 - Root path
 - SAP Table extraction folder
- No discovery scan will take place in sub-folders of a SAP Table extraction folder
