## 1.26.1-funcrel

### Other Updates

Internal Id	Details
DASHBOARDS-3456	Correction to fix an issue where the Technical Size indicator view is not working at single application level in the Health Dashboard.
DASHBOARDS-3454	Correction to fix an issue where the dashboard is not working in IE11.

## 1.26.0-funcrel

### New Features

Summary	Details
HD: Implemented "Search Application" option in the "Number of applications" page.	The multi-application level, now includes a new option "Search Application" which allows you to search application by name.
Support for ISO-5055 Index extension metrics in Health and Engineering Dashboards.	The new ISO-5055 Index extension is now supported with full functionality. New tiles have been added to both the Engineering and Health Dashboards to automatically display ISO-5055 data, with full drill down capability.

### Feature Improvements

Summary	Details
OMG efforts in Action Plan Recommendation feature	The Action Plan Recommendation (APR) feature is now using the OMG specified/modified efforts in its calculation. In addition, a new column called "Occurrences" has been added that represents the number of occurrences of any violation.
GUI - Adjustment Factor	The "Adjustment Factor" column in the "Technical Debt (OMG)" table now displays the value using 2 decimal places.

### Other Updates

Internal Id	Details
DASHBOARDS-3226	Exclusion View: Tooltip should be disabled in background, when dialog box is open.
DASHBOARDS-3346	Extend tile Description for engineering having encrypted string
DASHBOARDS-3366	Multiple API hits in the Active/Scheduled exclusions view
DASHBOARDS-3388	APR: Criteria and rules are always displaying from AIP assessment model when you change the health measure from industry standards AM
DASHBOARDS-3405	Trending Tiles do not take into account the timeframe
DASHBOARDS-3327	The dashboard build number has been removed from the footer, instead, the release number will be displayed.

### Resolved Issues

Customer Ticket Id	Details
--------------------	---------

28809	HD is failing to load with error - 'Bad connection definition' on latest versions (1.24 & 1.25)
28765	Inconsistent behavior observed while ordering Risk profile in Health Dashboard.
28740	In Health Dashboard, unable to sort based on number of LoC in a specific technology
28478	HD - Dashboard data appears to be overlapping
