- [Impacts of changes made to AIP Core 8.3.17 on Quality Model results post upgrade](#)
- [Other impacts of changes made in AIP Core 8.3.17](#)

All changes in results related to extensions are now listed in the extension documentation and will not appear in this page.

Impacts of changes made in AIP Core 8.3.17 on Quality Model results post upgrade

AIPCORE-904 - Violations removed in 8.3.x for Avoid declaring throwing an exception and not throwing it - 4656

After upgrade to 8.3.x (from 8.1.x), generation of post-upgrade snapshot and comparison of the results, many violations that were detected in AIP 8.1.x for the rule "Avoid declaring throwing an exception and not throwing it - 4656" are no longer visible in AIP 8.3.x. This is due to a bug in the SQL stored procedure which generates the results of this rule. This bug has now been fixed and therefore after an upgrade to AIP Core 8.3.17 and the generation of a post-upgrade consistency snapshot on unchanged source code, results may change: more violations may be visible for this rule, providing greater accuracy.

Other impacts of changes made in AIP Core 8.3.17
