## 1.0.0-funcrel

### New Features

| Summary                      | Details   |
|------------------------------|---|
| Bundle extensions validation | Bundle packaging will now be halted if version restrictions do not allow any versions of an extension to be added to the output bundle. |

### Resolved Issues

| Customer Ticket Id | Details   |
|--------------------|---|
| 25215              | Silent error adding extensions to bundle using ExtendCLI, resulting file does not contain any extension resolved, ExtendCli will now return an error indicating a failure to connect to configured extend server. |

## 1.0.0-beta2

### New support

| Summary  | Details   |
|--|---|
| Support <a href="#">Extend Offline</a> 1.1.0-beta1 | Support for creating update bundles targeting Extend Offline 1.1.0-beta1+                             |
| Proxy configuration                                | Added support for authenticated proxies and explicit proxy configuration.                             |
| Extension Directory Configuration                  | Added configuration parameter allowing the user to define a directory to which extensions are stored. |

### Other updates

| Details  |
|--|
| Improved error messages to be more explicit.                       |
| Improved help text.  |
| Bundle Template added that contains all User Community extensions. |
| Bundle Template added that contains all Labs extensions.           |

## 1.0.0-beta1

Initial release of the tool.
