

# Uninstall AIP Core

A dedicated uninstaller is available and can be accessed via the Microsoft Windows **Add or remove programs** control panel:

The screenshot shows the Windows 'Apps & features' control panel. At the top, there are sections for 'Optional features' and 'App execution aliases'. Below these is a search bar containing 'AIP'. Underneath the search bar, there are dropdown menus for 'Sort by: Name' and 'Filter by: All drives'. The search results show '3 apps found'. The first app is 'CAIP 8.3.30' with a size of '1.70 GB' and a date of '20/01/2021'. A red arrow points to this entry. The second app is 'CAST AIP Console 1.20.0' with a size of '506 MB' and a date of '23/11/2020'.

App Name	Size	Date
CAIP 8.3.30	1.70 GB	20/01/2021
CAST AIP Console 1.20.0	506 MB	23/11/2020

- Maintenance Releases that have been applied to a major/minor release (e.g: x.x.0) **cannot be uninstalled separately**. If you need to rollback to a previous Maintenance Release, you need perform an uninstallation and then re-install the required Maintenance Release.
- You should ALWAYS restart the workstation following an uninstall procedure to ensure that the Microsoft Windows registry is cleaned up.

This uninstaller is configured to **remove**:

- the contents of the %PROGRAMFILES%\CAST\CAST\ installation folder (or the equivalent custom location)
- any **shortcuts** on the desktop
- any **Start menu** entries

This uninstaller will **not remove** the following items:

- the contents of the %PROGRAMDATA%\CAST\CAST data folder
- the contents of the %APPDATA%\CAST\CAST data folder
- the contents of the %TEMP%\CAST\CAST temporary data folder
