

Install AIP Console and AIP Node packages for CAST Imaging

Three steps are required to install the AIP Console and AIP Node packages:

Step 1	AIP Console package - front-end installation	Run the setup to install the AIP Console package on a dedicated server
Step 2	AIP Node package - back-end installation	Run the setup to install the AIP Node package on each AIP Node package (where AIP Core is already installed) that you want to manage with AIP Console
Step 3	Initial configuration steps	Access AIP Console for the first time and run through the initialization wizard.
