

Removing the Technical Debt - OMG tile and related data

- [Introduction](#)
- [Removing the Technical Debt - OMG tile at single-application level](#)
 - [Step 1 - app.json changes](#)
 - [Step 2 - app-navigation.json changes](#)
 - [Step 3 - Apply changes](#)

Introduction

A Technical Debt - OMG tile is displayed, at both single and multi Application level:

Data displayed in the above tile relies on the presence of the **OMG Technical Debt** extension, therefore if you have not installed the extension the tile will show "N/A". This page explains how to remove this tile from the **single-application level** and its associated drill-down data if it is not required.

Removing the Technical Debt - OMG tile at single-application level

To remove the Technical Debt (OMG) tile and the data from Trends detailed view follow the below steps:

- **Step 1 - app.json changes**
- **Step 2 - app-navigation.json changes**
- **Step 3 - Apply changes**

Step 1 - app.json changes

Edit the **app.json** file:

```
WAR 1.x
CATALINA_HOME\webapps\
```

Locate the following sections and delete them. These may not be consecutively listed in the file therefore CAST recommends searching for the IDs 208 and 209 to locate the sections:

```
{
  "id": 208,
  "plugin": "SizingMeasureResult",
  "color": "yellow",
  "parameters": {
    "title": "Technical Debt (OMG)",
    "sizingMeasure": {"id": "OMG_TECHNICAL_DEBT", "format": "0,0", "description": "Days"}
  }
},

{
  "id": 209,
  "plugin": "SizingMeasureEvolution",
  "color": "purple",
  "parameters": {
    "widget": "line",
    "title": "Technical Debt (OMG)",
    "sizingMeasure": {"id": "OMG_TECHNICAL_DEBT", "format": "0,0"}
  }
}
```

Step 2 - app-navigation.json changes

Note that in **1.23**, the app-navigation.json file has been removed, therefore there is no need to follow this step.

Edit the **app-navigation.json** file:

```
CATALINA_HOME\webapps\<>dashboard>\portal\resources\internal\app-navigation.json
```

Remove this entire section from the file:

```

{
  "id": "OMGTechDebt",
  "plugin": "DetailView",
  "parameters": {
    "order": "descending",
    "mode": null,
    "title": "Technical Debt (OMG)",
    "format": "0,000",
    "description": "",
    "indicators": [
      {
        "key": "1062100",
        "name": "Technical Debt (Total)"
      },
      {
        "key": "1062103",
        "name": "Technical Debt (Reliability)"
      },
      {
        "key": "1062104",
        "name": "Technical Debt (Security)"
      },
      {
        "key": "1062102",
        "name": "Technical Debt (Performance Efficiency)"
      },
      {
        "key": "1062101",
        "name": "Technical Debt (Maintainability)"
      }
    ]
  }
},

```

If you are using **CAST Dashboards 1.21**, then you will also need to remove the following section from the **app-navigation.json** file:

```
{
  "id": "OMGTechDebt",
  "description": "Technical Debt (OMG)",
  "indicators": [
    {
      "description": "Total",
      "id": "1062100",
      "format": "0,0.0",
      "selected": true
    },
    {
      "description": "Reliability",
      "id": "1062103",
      "format": "0,0.0",
      "selected": false
    },
    {
      "description": "Security",
      "id": "1062104",
      "format": "0,0.0",
      "selected": false
    },
    {
      "description": "Performance",
      "id": "1062102",
      "format": "0,0.0",
      "selected": false
    },
    {
      "description": "Maintainability",
      "id": "1062101",
      "format": "0,0.0",
      "selected": false
    }
  ]
},
```

Step 3 - Apply changes

To ensure the changes are taken into account, the web applications needs to be restarted and browser cache should be emptied.
