

CMS - Application editor

Application editor

This section provides a detailed description of the **Application editor**. This editor essentially provides a means for you to configure your **Applications**. Applications are entities within a system (for example Invoicing and Debt Recovery applications within a Billing System).

The Application editor is divided into multiple tabs. Each tab is explained in a sub page - please select the tab you would like to know more information about:

- [Delivery tab](#)
- [Current Version tab](#)
- [Analysis tab](#)
- [Dependencies tab](#)
- [Production tab](#)
- [Content Enrichment tab](#)
- [User Input Security tab](#)
- [Architecture Models tab](#)
- [Modules tab](#)
- [Function Points tab](#)
- [Execute tab](#)
- [Notes tab](#)

Editor buttons

The following buttons are available in the view:

	Minimize > Minimize the entire window
	Maximize > Maximize the entire window
