

# Delivery Manager Tool - Package - Validation

## \*Purpose

This page provides the approach to troubleshoot the issues encountered while Project Validation phase of the package

The Project validation is a feature that will validate the resources that have been selected and extracted. Any missing resources will cause an alert to be generated - alerts are listed in the Package Content tab - Package generation alerts.

For more information, refer to :

- Delivery Manager Tool Online-help that is in <CAST INSTALLATION FOLDER>\DeliveryManagerTool\DeliveryManagerTool-Help.exe : CAST Delivery Manager Tool - Help > How to... > Package
- [Information Guides](#) > [Delivery Manager Tool DMT](#)
