

ACH - What's in the CAST Architecture Checker?

Starting from CAST AIP 8.3.23, **CAST Architecture Checker** will no longer be installed as part of the CAST AIP setup, whether installing CAST AIP from scratch or on a server where a previous release of CAST AIP exists. CAST Architecture Checker has evolved into a **standalone component** where all feature requests and bug fixes are now managed. This standalone component can be downloaded from **CAST Extend** (<https://extending.castsoftware.com/#/search-results?q=archchecker>).

Up-to-date documentation can be found here: [CAST Architecture Checker](#).

What's in the CAST Architecture Checker?

This section provides a detailed description of the contents of the CAST Architecture Checker - in other words, what elements and components are available in the Graphical User Interface (GUI).

The main elements available in the CAST Architecture Checker are:

- [Main menu](#)
- [Toolbar](#)
- [Layers and Sets window](#)
- [Types and Properties window](#)
- [Main window](#)
- [Options window / Content window](#)

Each of these is shown below:
