

# CMS Application - Modules

## \*Purpose

This page will help you solve problems related to Modules : Module content not as expected, missing objects, missing modules, missing items in the configuration, etc...

For more information, refer to:

Official documentation:

- For 8.3 : [CMS - Define a User Defined Module](#)
- For 8.2 : [CMS - Define a User Defined Module](#)
- For 8.1 : [CMS - Define a User Defined Module](#)
- For 8.0 : [CMS - Define a User Defined Module](#)

## \*Observed in CAST AIP

Release	Yes/No
8.3.x	✓
8.2.x	✓
8.1.x	✓
8.0.x	✓
7.3.x	✓

## \*Observed on RDBMS

RDBMS	Yes/No
Oracle Server	✓
Microsoft SQL Server	✓
CSS2	✓
CSS1	✓

## Action Plan

1. Check the [Hierarchy of Object Filters/Explicit Content in a User Defined Module](#) page that gives explanations about the impact of the configuration of your modules.
2. Select the section you are interested in:
  - [CMS Application - Modules - Missing modules](#)
  - [CMS Application - Modules - Module content overview](#)
  - [CMS Application - Modules - Incorrect module content](#)
  - [CMS Application - Modules - Filters](#)
3. If you do not find the information you are looking for or solution for your problem, in this page, contact [CAST Technical Support](#) with the below [relevant input](#) to help CAST Support team to reproduce the issue.

## Relevant Input

1. Sherlock ([CAST Support Tool \(CST\) - alias Sherlock](#)). Options to select are Export Log file, Export Database backup, Export configuration files, Export source code.
2. Relevant screenshots of the issue: missing objects, empty module, module generation aborting, etc...)
