

# CMS - Toolbar

## Toolbar

This page provides an explanation of the **CAST Management Studio Toolbar**:

	<b>Save All</b>	See <a href="#">Save All</a> .
	<b>Undo</b>	Use this option undo a change you have made. This can be used for example when adding an item to a view. It does not function against changes made in an editor.
	<b>Redo</b>	Use this option to redo a change you have previously undone. This can be used for example when adding /removing an item to/from a view. It does not function against changes made in an editor.
	<b>Verify</b>	See <a href="#">Verify</a> .
	<b>Audience</b>	<p>Choose the target audience type to modify the number of <a href="#">editor</a> tabs that are displayed in the CAST Management Studio:</p> <ul style="list-style-type: none"><li>• <b>Regular</b> &gt; Minimum number of tabs required to <a href="#">generate a snapshot</a>.</li><li>• <b>Advanced</b> &gt; More tabs displayed</li><li>• <b>Expert</b> &gt; All tabs displayed</li></ul> <p>The effect of choosing an option can be best seen in the <a href="#">Application editor</a>.</p> <p>Note that the selected audience will not persist between CAST Management Studio sessions. If you want the selected audience to persist, please change the same option in <a href="#">Preferences - CAST General</a>.</p>
	<b>Refresh</b>	<p>Use this option to refresh the current status of your source code Deliveries. The CAST Management Studio will connect directly to the <b>Source Code Delivery Folder</b> (see <a href="#">Preferences - Platform Setting</a> for more information) to obtain up-to-date information.</p> <p>See also the <a href="#">Delivery tab</a> in the <a href="#">Application editor</a>.</p>
