## 1.23.1-funcrel

## Resolved Issues

| Customer Ticket Id | Details |
|---|---|
| 27297 | Issue in RestAPI while extracting data in Datamart |

# 1.23.0-funcrel

## Feature Improvements

| Summary | Details |
|---|---|
| As a user, I would like to specify the improvement goal as grade or compliance | In Action Plan Recommendation, a new option "Compliance (in%)" is added for improvement goal. The Compliance slider indicates the target Compliance (in %) user would like to achieve for the chosen Health Factor (Compliance percentage range from 0 (worst) to 100 (best)). Refer: https://doc.castsoftware.com/display/DASHBOARDS/Engineering+Dashboard+-+Action+Plan+Recommendation |
| App-navigation dependency is removed for custom tile configuration | In case of custom tile configuration, there will be no more dependency on app-navigation file |
| API timeout period now configurable in Health Dashboard | A new option has been added to the cmp.json file that allows users to configure how long the Health Dashboard will wait for the API to respond while fetching data: timeoutPeriod. This option is set by default to 60000ms (1 minute) and a custom value can be used when your Health Dashboard contains a large number of applications or several extremely large applications to increase the timeout period. The value was hardcoded to 60000ms (1 minute) in previous releases of the Health Dashboard and was not configurable. Refer: https://doc.castsoftware.com/display/DASHBOARDS/Health+Dashboard+json+configuration+options. |

## Other Updates

| Internal Id | Details |
|---|---|
| DASHBOARDS-3045 | HD - Redesign - custom trends page - selecting time analysis giving a blank page. |
| DASHBOARDS-3035 | HD - Tiles with number format not showing proper value |
| DASHBOARDS-2940 | ED - Sidebar icon is not selected on reload of the page |
| DASHBOARDS-3049 | HD - Redesign - Rule section loading when HD to ED drilldown with module selected |

## Resolved Issues

| Customer Ticket Id | Details |
|---|---|
| 26898 | HD - Dashboard data is not available in the Tiles after creating the XML for background Fact and Running the new Analysis/Snapshot |
| 26763 | ED - "Application Components" tile is not loading for the application |
| 26868 | HD - Evolution of custom tile is not showing in HD |
| 26454 | HD - Performance issues with Health Dashboard as number of apps and snapshots increases |
