2.2.0-funcrel

New Features

Summary	Details
High number applications management: Remove all the slow loading tiles if application count is above a specific threshold.	A new parameter "snapshotThreshold" [default value 1500] has been added in cmp.json/cmp-ISO.json to check if the total snapshot count is more than the default value. If snapshot count is more than the default value then all slow loading tiles will not be displayed (after login) in the portfolio view, therefore increasing the performance of the home page. Other Updates

Internal Id	Details
DASHBOARDS-3552	Session timeout dialog box appears when accessing the admin page through URL.
DASHBOARDS-3673	Issue in application selection and deselection when applications have the same name.
DASHBOARDS-3696	Applications are duplicated in assign application drop down list.
DASHBOARDS-3698	Implement session timeout option in user management view.
DASHBOARDS-3718	SAML: User is also getting removed from the list when clicking on remove button.
DASHBOARDS-3726	Admin user is able to delete the admin role and on reload - display become admin page even though user context has admin role.
DASHBOARDS-3729	SAML: User management view does not load the list and API server/users-groups returns 500 internal server error.
DASHBOARDS-3747	Regression: User management view is displaying the list from LDAP when logged in with default user.
DASHBOARDS-3751	User management: on unselect all tags/technology, selected applications are vanishing.
DASHBOARDS-3760	'Re-Login' button is not enabled after the timeout and the page is getting redirected to login page.

DASHBO ARDS- 3794	LDAP: User search list is disappearing after assigning a role to any user
DASHBO ARDS- 3797	APO window is disappeared when changing the effort grade value to 4
