New Features

Summary	Details
New drop-down in Health Dashboard home page to switch between AIP and ISO tile view	A new drop-down has been added to both the portfolio and application home page which allows you to change the tile view based on default AIP data or ISO-5055 data generated by the ISO-5055 extension. This new view uses new .json configuration files (app-ISO.json and cmp-ISO.json). See https://doc.castsoftware.com/display/DASHBOARDS/Health+Dashboard+-+GUI#HealthDashboardGUI-Landingpage .
Technology filter implementation in the Health Measure drill down page in the Health Dashboard	A new "Technology" filter has been added to the Health Measure drill down page (similar in functionality to the existing Module filter). See https://doc.castsoftware.com/display/DASHBOARDS/Health+Dashboard+-+GUI#HealthDashboardGUI-ModuleandTechnologysselector .

Feature Improvements

Summary	Details
HD: Functionality to change the ISO-5055 tile view	Tiles in the new ISO-5055 view which rely on ISO-5055 data can all be modified to use other ISO-5055 technical criteria. See https://doc.castsoftware.com/display/TECHNOS/Manual+configuration+of+Dashboard+tiles+using+ISO-5055+data .

ED: Industry standard tiles should show non-critical violation counts by default

Industry standard tiles will show total violation counts by default, and will not change when the Critical violations toggle is enabled.
