

Installation and update - Microsoft Windows traditional installer

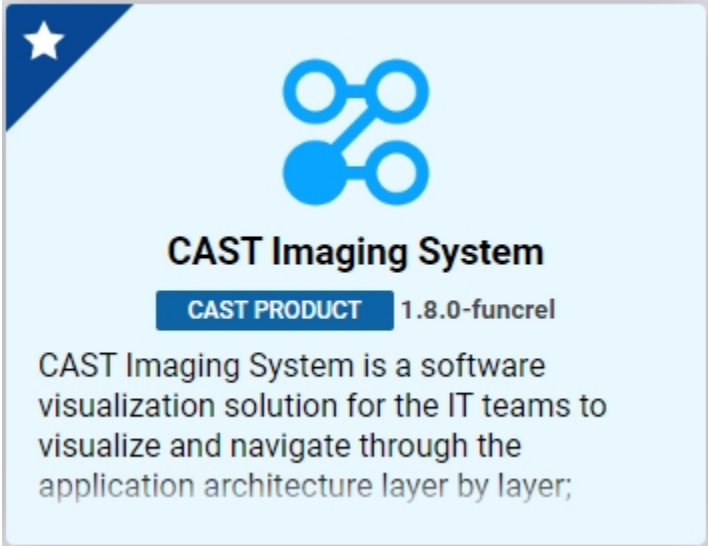

- [Where can I obtain CAST Imaging installation media](#)
 - [1.10.0](#)
 - [1.9.0](#)
- [Installation options](#)

 See [here](#) for more information about the **third-party software** that is shipped and installed with CAST Imaging.

Where can I obtain CAST Imaging installation media

1.10.0

You can obtain installation media from [CAST Extend](#):

1.9.0

You can obtain CAST Imaging from the [CAST Product Center](#) - this requires a CAST login.

Installation options

CAST Imaging is delivered in a **ZIP file**. Ensure you extract this ZIP file - within it you will find two **executable files** which contain the installation setup:

ImagingSystemSetup.exe	<p>This is the "full" installation executable - this contains all items required to install CAST Imaging from scratch. This can be used where a machine has no previous installation of CAST Imaging.</p> <p>Installation process: Clean installation - Microsoft Windows traditional installer.</p> <p>Once the installation process is complete, please see the CAST Imaging - User Guide for information about using CAST Imaging.</p>
ImagingSystemUpdate.exe	<p>This is a "partial installation" executable - this will update an existing installation of CAST Imaging. All data imported into the previous installation will be retained and reused.</p> <p>It does not contain all the items that are delivered in the "full" installation executable and cannot be used to install CAST Imaging from scratch.</p> <p>To update to a new release of CAST Imaging, see Update an existing installation - Microsoft Windows traditional installer.</p>
