i Summary: this page describes the new features and bugs that have been fixed in the CAST Security Dashboard 1.8.1.

Content matrix

Version	Summary of content
1.8.1	<ul style="list-style-type: none">• Minor tile update

Updates

SECJAVA-90 - Existing GDPR tile renamed DATA SAFETY

The default tile **GDPR** has been renamed and now uses a different tag:

Old Name	Old Tag	New Name	New Tag
GDPR	AIP-GDPR	DATA SAFETY	DATA-SAFETY

The behaviour of the tile has not changed - i.e. the tile displays the number of **Violations** or **Critical Violations** in the Application for rules that have the **selected tag** (i.e. DATA-SAFETY). Clicking on this tile navigates to the **Risk investigation view** with the **specific tag selected** at the top of the table. "All Rules" will be selected in the Technical Criteria table and the list of rules displayed will all be tagged with the selected tag:

Click to enlarge

The screenshot shows the CAST Security Dashboard interface. The 'Technical Criteria' table has 'All Rules...' selected. The 'Rules...' table shows a list of rules, with the 'DATA-SAFETY' tag selected in the dropdown menu. A red arrow points from the 'All Rules...' selection to the 'DATA-SAFETY' tag selection.

Technical Criteria				Rules...
TECHNICAL CRITERION	Violations	Critical Violations	Percentage	Rules...
All Rules...	n/a	n/a	n/a	DATA-SAFETY
Secure Coding - Input Validation	+90	0	+12%	0 0 4 0.00%
Programming Practices - Error and Exception Handling	+110	0	+32%
