

ISO declaration of conformance

CAST AIP conforms with the following [ISO \(International Organization for Standardization\)](#) standard: [ISO/IEC 19515:2019](#).

CAST management hereby formally states that the Application Intelligence Platform (AIP) versions 8.3 and above are conformant to the formal specification for Automated Function Points (AFP) as expressed by the [ISO/IEC 19515:2019](#) standards documentation. CAST AIP also supports and fully implements the [Object Management Group's](#) (OMG) [AFP Standard 1.0](#), document number [formal/2014-01-03](#).

CAST is committed to continuing support for automated function point counting standards produced by OMG and ISO. CAST is already implementing the coming Automated Enhancement Function Points (AEFP) and Automated Enhancement Technical Points (AETP) standards, being worked by the Consortium for Information and Software Quality (CISQ) and the OMG.

Current versions of AIP are in full compliance with the AFP specification and are expected to remain in compliance with this and future function point automation specifications.
