

Add version

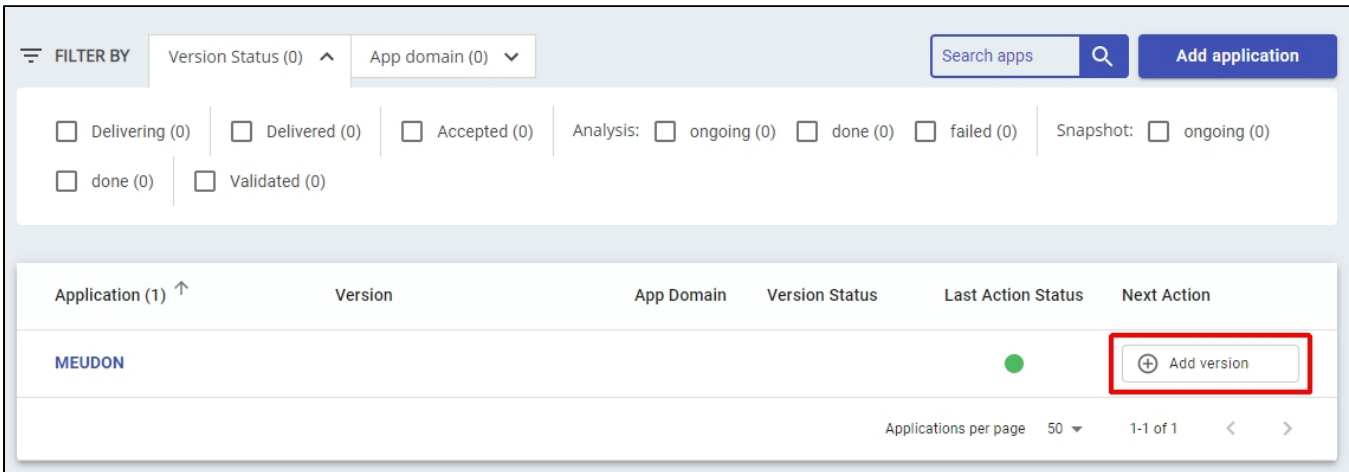

Add a new Version

To access Console, use the following URL (ensure you specify the correct **server** and **port number**): `http://<server>:8081/ui/index.html`. Then move to the **Console** screen if you are not already there:

Find the newly created Application - in this example it is called "**MEUDON**" - and click the **Add Version** icon:

Click to enlarge

The **Delivery wizard** is then displayed - see below.
