

AIPIMG Add version for rescan

Add a new Version

To access AIP Console, use the following URL (ensure you specify the correct **server** and **port number**): `http://<server>:8081/ui/index.html`. Then move to the **AIP Console** screen if you are not already there:

Find your existing Application - in this example it is called "MEUDON" - and click **Add version**:

A screenshot of the AIP Console application list. The interface shows a table of applications with columns for Application, Version, App Domain, Version Status, Last Action Status, and Next Action. The application 'MEUDON' is listed with version 'Version-2021-01-26T17-25-01' and status 'Imaging processed'. A red box highlights the 'Add version' button in the 'Next Action' column, with a red arrow pointing to it. The interface also includes a search bar, filter options, and pagination controls.

Application (1) ↑	Version	App Domain	Version Status	Last Action Status	Next Action
MEUDON	Version-2021-01-26T17-25-01		Imaging processed	●	+ Add version
