

# Tools - Alert Ignore List Builder - Release Notes

## Summary

- [1.1.0](#)
- [1.0.0](#)

### **1.1.0**

New optional argument to be set in the batch file : JUSTIFICATION. All alerts will be ignored with this text as justification.  
If not set, then a default justification text will be generated, containing the name of the extension, and specifying the regular expression pattern used to decide that the alert should be ignored.

### **1.0.0**

First version
