2.8.0-funcrel

Resolved Issues

Customer Ticket Id	Details
37064	Removes Wrong NodeJS unknown database. Correction is made to prevent the erroneous creation of "NodeJS Unknown Database" objects. So removing the objects also removes links to these objects.

Other Updates

Details
Data entity objects are set as data entity in the default TCC configuration. The way NodeJS objects are handled for Function Points has changed. Following objects are now handled as "Data Entity" objects for Function Point: CAST_NodeJS_S3_Bucket, CAST_NodeJS_Unknown_S3_Bucket, CAST_NodeJS_Azure_Blob_Container, CAST_NodeJS_Azure_Unknown_Blob_Container, CAST_NodeJS_CosmosDB_Collection, CAST_NodeJS_CosmosDB_Unknown_Collection, CAST_NodeJS_MongoDB_Collection, CAST_NodeJS_Unknown_MongoDB_Collection, CAST_NodeJS_Marklogic_Collection, CAST_NodeJS_Collection, CAST_NodeJS_Redis_Collection, CAST_NodeJS_Unknown_Redis_Collection

2.8.0-beta1

Resolved Issues

Customer Ticket Id	Details
36024	Fixed missing link between HTML function and MongoDB collection.
36524	Fixed missing nodejs Express operations.
32299	Fixed link to SQL query not from good caller.
36236	Fixed missing nodejs SQL query object.
34349	Fixed missing link to NodeJS MongoDB collection

Link Improvements

Callee Type	Caller Type	Details
JavaScript Function or	AWS API Gateway or AWS Lambda.	Fixed missing link to lambda handler.

Other Updates

Details
Update type description for AWS objects.

Remove Region symbols for support AWS S3 with SDK V2.

Remove CAST_HTML5_JavaScript_SourceCode symbols which were created due to use of any external library other than the Node.js "fs" module.
