

CMS - Assessment Models view

Assessment Models view

This section provides a detailed description of the **Assessment Models view**. This view essentially provides a means for you to manage your Assessment Models - i.e. the models that govern the **Quality Rules/Distributions/Measures** that are used in the [Snapshot generation](#) process.

Notes

- This view will display Assessment Models as follows (see the [Dashboard Service editor](#) for more information):
 - the default Assessment Model supplied by CAST during the installation - **CAST <version> Assessment Model**
 - those that have been manually created using the  button - **Default Assessment Model (CAST AIP <version> + Extensions)-N**
 - Assessment Models imported from the [Dashboard Service](#) using the **Import Assessment Models** option located in the [Dashboard Service editor](#)

Assessment Models shortcut menus

The following shortcut menu items are available in the view:

Assessment Model selected

	Edit	Use this option to modify the properties of your Assessment Model. The Assessment Model editor will be displayed.
	Remove	Please see Remove . Note that removing an Assessment Model can take several minutes depending on the hardware resources and activity. Indeed, an Assessment Model is composed of thousands of items that can be referenced in other parts of the configuration and removal must ensure data integrity while deleting items.

No item selected

<p>Calculate the difference between two Assessment Models</p>	<p>Use this option to compare two Assessment Models. A dialog will open enabling you to choose the two Assessment Models you want to compare:</p>  <ul style="list-style-type: none"> • Choose the Assessment Models by clicking the drop down box and selecting the appropriate Assessment Models in the A and B fields. Note that the Assessment Models view before you can choose it for comparison purposes. • Then choose a name and location for the result file. Results will be output to a .CSV file which can be opened with Microsoft Excel or other compatible ed
<p>New Assessment Model</p>	<p>Use this option to create a brand new Assessment Model. An item named Default Assessment Model (CAST AIP <version> + Extensions)-N will be displayed:</p> <ul style="list-style-type: none"> • The new Assessment Model will contain the default Assessment Model provided with your release of CAST AIP • If you have installed any official or custom CAST AIP Extensions that include an Assessment Model "fragment", i.e. specific Quality Rules/Measures/Distributions) will also be included in the new Assessment Model that is created. • When you add a new Assessment Model it will not be assigned to any Dashboard Service database and therefore won't be used when you generate a snapshot, please see the Assessment Model tab in the Dashboard Service editor for more information.
