

Architecture Model violation tile

The Architecture Model tile (not available out of the box) displays all **Architecture Models** that have been assigned to the Application and checked during the snapshot. The tile displays the number of violations/critical violations (depending on the configuration of the **criticalsRulesOnly** parameter in the tile configuration) per Architecture Model. Clicking an Architecture Model will drill down and display the details of the selected rule in the [Risk Investigation page](#).

Rule Name	Critical Violations
Architecture Check: ... mple Model	289

Configuration

- **type:** tile type has to be *ArchitectureModel*
- **parameters:**
 - **business:** must be set to **60017**
 - **criticalsRulesOnly:** set to **true** or **false** depending on requirements - Architecture Models can be set to either **Critical** or **Non-Critical** - therefore all violations of the model will either be Critical or Non-Critical:
 - **true:** the tile will display only Critical Violations
 - **false:** the tile will display Non-Critical Violations
- **color:** tile color
- other parameters for sizing and positioning of the tile - see [Tile Sizing and Positioning](#).

Example

```
{
  "type": "ArchitectureModel",
  "parameters": {
    "business": "60017",
    "criticalsRulesOnly": false
  },
  "color": "blue-dark",
  "col": 7,
  "row": 1,
  "sizex": 2,
  "sizey": 1,
  "min-sizex": 2,
  "min-sizey": 1,
  "max-sizex": 4,
  "max-sizey": 4
}
```
