

Industry Standard tiles

 These tiles need to be configured manually.

Industry Standard tiles are designed to display **violation count data** generated by the following CAST extensions that provide data about industry standards. These are:

- [CISQ](#)
- [MIPS Reduction](#)
- [ISO-5055](#)
- [OWASP](#)

Configuration

- **type:** tile type has to be *IndustryStandards*
- **parameters:**
 - **title:** Title of the tile
 - **id:** the Quality Standards or custom tag you wish to view
 - **description:** a free text field to describe what the tile shows (not shown in the dashboard)
- **color:** tile color
- other parameters for sizing and positioning of the tile - see [Tile Sizing and Positioning](#)

Example

This example will display a tile showing the number of violations for the CISQ Index Business Criterion (1062100):

```
{
  "type": "IndustryStandards",
  "parameters": {
    "title": "CISQ",
    "id": "1062100"
  },
  "color": "green",
  "col": 4,
  "row": 2,
  "sizex": 1,
  "sizey": 1,
  "max-sizex": 2,
  "max-sizey": 1
},
```

Clicking on the tile navigates to [Risk investigation view](#) and the specified Industry Standard will be selected in the Health Factor table. This tile displays N/A if the application does not have data for industry standards and the clicking option is disabled in this case.
