

Delivery Manager Tool - Information - How to get the list of custom plugins

Purpose

This page provides you with the method to retrieve the list of custom plugins that have been installed by a user.

For more information, refer to:

For CAST AIP Version 8.0.x and higher : [Pages Extending CAST AIP > Skip to end of banner > Go to start of banner > Install an extension > Step 2: Handle DMT plugins](#)

Applicable in CAST Version

Release	Yes/No
8.3.x	✓
8.2.x	✓
8.1.x	✓
8.0.x	✓
7.3.x	✓

Applicable RDBMS

RDBMS	Yes/No
Oracle Server	✓
Microsoft SQL Server	✓
CSS2	✓

Action plan

1. Open a Command prompt
2. Go to your **StandardPlugins** folder that is in your **<CAST Installation folder>\Deliverymanagertool folder** by running the the following command line :

```
cd <YOUR CAST INSTALLATION>\DeliveryManagerTool\standardPlugins
```

3. Save the list of folder inside the **standardplugins** folder in a csv file by running the following command line :

```
dir/w >"<YOUR FILES OUTPUT>\standard_plugins.csv"
```

Figure 1

4. Go to the the folder where you saved the list and open the **Standard_Plugins.csv** with Excel

10. Do a text replacement in **Regular Expression** mode.
 - a. Replace "." with "-", click replace all
 - b. Replace ";" with "\n", click replace all
 - c. Save the file in csv format in the same location as the Standard_Plugins.csv file

Figure 4

The result will be like :

Figure 5

11. Open the two csv files with Excel
12. Compare them using the option **vlookup** in the file Entity_plugins.csv : The formula is **=IF(ISNA(VLOOKUP(A1;Standard_Plugins.csv!\$A:\$A;1;0)));"THIS PLUGIN IS NOT A STANDARD PLUGIN, IT MUST TO BE ADDED";"THIS IS A STANDARD PLUGIN")**

Figure 6

13. The additional plugins are those that are not found by the vlookup function.
