

# Console V2 Migration Tool - Release Notes - 1.0

- [1.0.1-funcrel](#)
  - [New Features](#)
  - [Other Updates](#)
- [1.0.0-funcrel](#)
  - [Note](#)

## 1.0.1-funcrel

### New Features

Summary	Details
WEBI-12905	Fixes an issue related to Console Migration tool - backup Management tables before migrating Configuration DB. Take a backup of the tables that will be updated so that in case of an issue user can revert.

### Other Updates

Internal Id	Details
WEBI-12922	Console Migration tool - Could not find or load main class PRODUCTMigration. When the migration tool was installed in folder name with blank space, following error was displayed: Could not find or load main class PRODUCTMigration.
WEBI-12852	Console Migration tool - Zip creation fail - the process migration should not stop. During migration process, in the step where files in Console 1 is failing, it should not abort the migration. It should continue the process and it must report that the zip process has failed, and then describe what must be copied manually.

## 1.0.0-funcrel

### Note

This is the first release of the Console V2 Migration Tool. This is a command line based tool (Console-V2-Migration.exe) that will migrate ALL applications managed in Console V1 into Console V2. Documentation is provided here: <https://doc.castsoftware.com/display/DOCCOMConsole+V2+Migration+Tool+-+1.0>.
