 **Summary:** This document provides information about changes and new features introduced in this release of NoSQL for Java.

## 1.3.0-funcrel

### Updates

Below table lists the bugs fixed in the 1.3.0-funcrel release:

| Internal ID   | Call ID | Summary  |
|---------------|---------|--|
| NOSQLJAVA-418 | -       | Connection and Links missing for Mongo with Java     |
| NOSQLJAVA-419 | -       | Connection and Links missing for Couchbase with Java |
| NOSQLJAVA-429 | -       | Attribute error in memcache.py                       |
| NOSQLJAVA-433 | -       | Parenthesis has no attribute get_statements()        |

## 1.3.0-beta1

### Updates

- Support of batch Operations for Couchbase Java SDK
- Support of N1QL queries for Couchbase Java SDK

## 1.3.0-alpha2

### Updates

Following new rules have been added (Under Technical Criterion: SQL and Data Handling Performance). See [https://technologies.castsoftware.com/rules?sec=srs\\_nosqljava&ref=|1.3.0-alpha2](https://technologies.castsoftware.com/rules?sec=srs_nosqljava&ref=|1.3.0-alpha2):

|         |   |
|---------|---|
| 1101922 | Avoid having multiple Artifacts updating data on the same NoSQL Collection (JEE)  |
| 1101924 | Avoid having multiple Artifacts inserting data on the same NoSQL Collection (JEE) |
| 1101926 | Avoid having multiple Artifacts deleting data on the same NoSQL Collection (JEE)  |

## 1.3.0-alpha1

### Updates

Initial support for **Couchbase Java SDK**:

- Creation of cluster and bucket object.
- Crud Operations.
