SAP Analysis Unit editor - Source Settings tab

This section provides a detailed description of the specific **Source Settings tab** in the **SAP Analysis Unit editor**:

Source Settings tab

Project path	<p>The file based location of the corresponding project. This field is read-only.</p> <p> Notes</p> <ul style="list-style-type: none"> When the field contains User defined, this indicates that the Analysis Unit has been defined manually instead of automatically following the use of the CAST Delivery Manager Tool.
Source Folders	<p>Use this section to include or exclude specific source files for the Analysis Unit for analysis purposes - these are mainly to be used when you are manually creating your Analysis Unit but can also be used if you are modifying an automatically created Analysis Unit.</p> <ul style="list-style-type: none"> Use the buttons to include or exclude specific Source Files or Source Folders (folders are searched recursively). By default CAST will automatically suggest the Deployment Folder set in the Current Version tab (Application editor) for your Package when adding new source code folders or files. Use the button to remove an existing entry Use the button to edit an existing entry If this Analysis Unit is automatically defined use the button to reset the list to the entries defined by the CAST Delivery Manager Tool <p>If this Analysis Unit is automatically defined, then any auto defined entries will be read only.</p>
SAP Tables folder	<p>Defines the file location of your extracted SAP tables. Note that you can place *.SQLTABLESIZE files (see How to enable the XXL Quality Rules using the Table Size Folder) in this folder provided you leave the Tables Sizes Folder field blank.</p>
Tables Sizes Folder	<p>See How to enable the XXL Quality Rules using the Table Size Folder for more information.</p>
