

Oracle Forms and Reports - Qualification

Before you can package, deliver and analyze your source code, you should "qualify" the application you are working with in order to ensure that a snapshot can be generated successfully and that it contains the results you expect. Please use the guides below to help you do this:

- [Oracle Forms and Reports - Covered technologies](#)
- [Oracle Forms and Reports - Required third-party software](#)
- [Oracle Forms and Reports - Technical notes and limitations](#)
