1.14.0-funcrel

Resolved issues

No customer bugs reported for fix in this release.

Updates

.NET Core 3.1.x SDK required

This release of **Report Generator** and **Report Generator for Dashboards** require a **manual installation** of **.NET Core 3.1.x SDK (minimum)**. .NET Core 3.1.x SDK is an **LTS release** and will be supported by Microsoft for longer.

Application	Minimum SDK required?	Notes
Report Generator GUI	.NET Core 3.1.x SDK	The .NET Core 3.1.x SDK should be manually installed BEFORE or AFTER running the Report Generator setup installer (the setup installer will not install this for you). See CAST Report Generator - Installation process for more details.
Report Generator for Dashboards		Previous releases of Report Generator for Dashboards required the .NET Core runtime . To avoid confusion, both Report Generator GUI and Dashboards will now require the SDK . See CAST Report Generator - CAST Report Generator for Dashboards for more details.

 Note that if Report Generator GUI **does not launch**, or a **.NET error message is displayed when attempting to launch it**, this usually means that the required release of .NET Core is not installed on the machine (either nothing is installed at all, or the wrong type is installed e.g. runtime vs SDK).

Template updates

 See also [Components documentation for Report Generator 1.14.0](#) for more information about template changes and requirements.

New templates

 All new templates require [Quality Standards Mapping](#) extension v. 20200302, and CAST-RESTAPI 1.12.0.
