

AWS SQS

- [List of supported languages/deployment frameworks](#)
- [More about support for each language with CAST AIP](#)

The support for AWS is distributed among several CAST extensions. This page and its sub-pages summarize what is supported for AWS **when using most recent versions** of CAST extensions.

List of supported languages/deployment frameworks

Amazon Web Services Lambda can be implemented and deployed with several tools (i.e. deployment frameworks) using several languages. The following table shows what language is supported with what framework:

Language	Deployment Framework	
	AWS Software Development Kit (SDK)	Cloud Development Kit (CDK)
Node.js (JavaScript)	✔ (v2.x)	✘
Node.js (TypeScript)	✔ (v2.x, v3.x)	✘
Java	✔ (v1.x, v2.x)	✘
.NET	✔ (v3.x)	✘
Python	✔ (boto3)	✘
	Cli Tools	
	AWS CLI	AWS CDK Toolkit
Shell	✔ (v1, v2)	✘

More about support for each language with CAST AIP
