

# CMS Snapshot Analysis - Run Analyzer - HTML5 Javascript - Error Free Logs - CAST AIP 83

## Purpose

This page provides the description of the different logs which are created when generating an analysis with HTML5 Javascript.

For more on HTML5 Javascript analyzer, see the documentation here: [HTML5 and JavaScript](#)

In this page, the different logs lines corresponding to the **Run Analyzer - HTML5 Javascript** are listed with functional and technical explanation of the logs that it generates. Here is a listing of the generated logs and sub-sections:

- CAST-MS-<date>-<time>.log.txt
- Analysis log <job name>-<execution unit id>-<date>-<time>.log.txt
- Application Configuration and Settings
- File Analysis
- Saving, Comparing, Merging and Execution Summary
- MA\_My\_Source\_file\_based-<date>-<time>.castlog
- CAST\_MainTask\_SummaryLog-<date>-<time>.txt

Task	Duration	Progress	Log	Results
Take a snapshot of the application	6m28s			
Snapshot generation	6m28s			
Synchronize Services	1s			
Application "J2EE Application"	4m36s			
Tools before analysis	13s			
My SQL Tool	1s		Yes	
Run CSV generation	6s		Yes	
My External Program	7s		Yes	
Run analysis for "J2EE Application"	1m54s			
Run SQL Analyzers "My Package 2_15668"	20s		Yes	
Compute Analysis Unit full content	1s			Number of objects selected : 29
Compute content for Refined Target	1s			
Run metrics calculation for My Package 2	20s		Yes	
Compute dependency dataset	1s			Number of objects selected : 41
Run J2EE Analyzer "My Source file based execution unit_15712"	40s		Yes	
Clean dependency dataset	1s			
Compute Analysis Unit full content for BusinessHelloWorld	1s			Number of objects selected : 93
Run metrics calculation for My Source file based execution unit	22s		Yes	
Run Universal Analyzer "HTML5_37480"	2m36s		Yes	
Clean dependency dataset	1s			
Compute Analysis Unit full content for HTML5	1s			Number of objects selected : 1103
Run metrics calculation for HTML5	27s		Yes	
Run reference pattern "My Reference Pattern"	10s			
Create source set for My Reference Pattern	1s			Number of objects selected : 175
Create target set for My Reference Pattern	1s			
Run Reference Finder Analyzers "RP_My Reference Pattern_15732"	9s		Yes	
Delete source set for My Reference Pattern	1s			
Delete target set for My Reference Pattern	1s			
Run Extensions at application level for J2EE Application	3s		Yes	
Tools after analysis	2m35s			
My SQL Tool	1s		Yes	
My External Program	2m00s		Yes	
My Update CAST Knowledge Base	3s		Yes	Knowledge Base Modifications successful
Run Universal Importer "My Universal Importer"	14s		Yes	
Run CSV generation	7s		Yes	
Create source set for My Reference Pattern	1s			Number of objects selected : 175
Run Reference Pattern Search String "My Reference Pattern Search String"	9s		Yes	
Delete source set for My Reference Pattern	1s			
Run Escalated Links Calculation on "J2EE Application"	2s			
Run Copy Paste metrics calculation for J2EE Application	4s			
Analyze Copy Paste code	1s			
Save results to database	3s			
Run Dynamic Link Manager	1s		Yes	
Update SQL XML Table Size for "J2EE Application"	1s			skipped : no Table Size data
Run Data Flow Security Analysis on "J2EE Application"	1s			skipped : User input security is not activated for this application
Prepare snapshot in "cb802_sbo_local"	6s			
Generate Modules in "cb802_sbo_local"	1s			
Run CSV generation	6s		Yes	
Run Path builder on "cb802_sbo_local"	1s			
Update Sources in "cb802_sbo_local"	1s			
Finalize Data Flow Security in "cb802_sbo_local"	1s			
Create Architecture Model in "cb802_sbo_local"	1s			
Create Architecture Model in "cb802_sbo_central"	1s			
Synchronize Assessment Model in cb802_sbo_central	12s			
Create Snapshot Definition in "cb802_sbo_central"	1s			
Compute Snapshot in "cb802_sbo_central" with associated Analysis Services	1m06s		Yes	
Configure snapshot data into dashboard service.	1s		Yes	
Transfer sources, positions and bookmarks into dashboard service.	1s		Yes	
Synchronize Snapshot List from "cb802_sbo_central"	1s			
Dashboard automation in "cb802_sbo_central"	1s			
Execution Summary	1s		Yes	

CAST-MS-date-time.log.txt

## CAST-MS-<date>-<time>.log.txt

Section of *CAST-MS Management Studio log file* dealing with HTML5 Javascript analyzer. Get the location at [CAST Logs location](#).

This section provides the information of the type of analyzer being used based on the technology which is being analyzed in the application. It provides the details about the command line for running universal analyzer, connection profile and also provides the path of the Analysis Log for more details about the analysis of a single Analysis Unit.
