Feature Improvements

Summary	Details
UI - Improvements to the Report Generation page	The Report Generation page has been re-designed to make it more user friendly. The changes will help users to sort and search the reports in the "Standard Compliance Report Category". In the "Miscellaneous Reports" category, users can now view the details of the selected report on the same page. Refer: https://doc.castsoftware.com/display/SECURITY/Security+Dashboard+-+Report+Generation
UI - Report Generation - Multi language support	With the multi language support, reports can now be generated in the following languages - German, Italian, Spanish, French, and Chinese. Refer: https://doc.castsoftware.com/display/SECURITY/Security+Dashboard+-+Report+Generation#SecurityDashboardReportGeneration-Introduction
UI - Report Generation - Support for CWE Top25 2022 reports	Two new reports have been added: CWE Top25 2022 Compliance and CWE Top25 2022 Detail to provide data on the CWE TOP 25 2022 standard. Refer: https://cwe.mitre.org/top25/archive/2022/2022_cwe_top25.html .

Other Updates

Internal Id	Details
DASHBOARDS-4776	Fixes an issue related to "Log4j - 2.17.1" in the Dashboard for Console SE (present in cast-integrated-health-engineering-dashboard-for-console-se.jar).

Resolved Issues

Customer Ticket Id	Details
37136	Fixes an issue, where an error occurred while configuring LDAP with Dashboard.
