2.4

Content matrix

Version	Summary of content	Comments
2.4.3-funcrel	Bug fixes to resolve two CVE vulnerabilities found in CAST Dashboards: CVE-2021-45046 (for Apache Log4j) and CVE-2021-23463 (for h2database).	Can be used with: 8.3.3
2.4.2-funcrel	This version is not available.	
2.4.1-funcrel	Bug fixes to resolve two CVE vulnerabilities found in CAST Dashboards: CVE-2021-44228 (for Apache Log4j) and CVE-2021-43466 (for OWASP).	
2.4.0-funcrel	**Roles and data authorizations**: Roles and data authorizations feature moved from beta to functional release **User Profile:** In LDAP mode, if there is no search object, the user list is displayed based on the assigned profile/s	

2.4.3-funcrel

Other Updates

Internal Id	Details
DASHBOARDS-4238	Upgrade Log4j to v 2.16 to resolve CVE-2021-45046. Refer: https://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2021-45046 and https://doc.castsoftware.com/display/CAST/Apache+Log4j+-+CVE+vulnerabilities (CAST documentation).
DASHBOARDS-4241	Update to fix CVE-2021-23463. Refer: https://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2021-23463.

2.4.2-funcrel

Note

This version is not available.

2.4.1-funcrel

Other Updates

Internal Id	Details
DASHBOARDS-4233	Upgrade Log4j to v 2.15 to resolve CVE-2021-44228. Refer: https://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2021-44228 and https://doc.castsoftware.com/display/CAST/Apache+Log4j+-+CVE-2021-44228.
DASHBOARDS-4236	Fix CVE-2021-43466 for OWASP. Refer: https://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2021-43466.

2.4.0-funcrel

Feature Improvements

Summary	Details
UI - User Role /Profile feature	The User Role/Profile feature is now functional. See https://doc.castsoftware.com/display/DASHBOARDS/User+roles+-+2.x+and+above.
UI - User Role /Profile feature	When LDAP authentication mode is active, the list of users/groups will display the list of users/groups based on their assigned profile by default. When a user/group search is initiated, users/groups matching the search string will be displayed. See https://doc.castsoftware.com/display/DASHBOARDS/User+roles+-+2.x+and+above.
Admin - Encryption of database credentials	It is now possible to encrypt database credentials for both the application schemas and the user role/profile schema. See https://doc.castsoftware.com/display/DASHBOARDS/Encrypt+login+and+password+for+database+and+LDAP.

Other Updates

Internal Id	Details
DASHBOARDS-4042	Fixed an issue where the "view as" option was present in every view, after navigating to the Risk Investigation view.
DASHBOARDS-3917	Fixed an issue that occurred when the user role/profile database was used by multiple dashboards: the user authorization table would work in only one dashboard - in all other dashboards the view would not load correctly.
DASHBOARDS-3886	Fixed an issue that occurred when switching between authentication modes: when using the "Become Admin" option, the resulting User authorization view was empty.
DASHBOARDS-3855	Fixed an issue where the "Show more" option in the Action Plan Recommendation page was not displaying the correct count of violations.
DASHBOARDS-3081	Removed surplus padding to the right in the Report generation page.
DASHBOARDS-4096	Fixed an issue where adjustment factor detail values were rounded incorrectly.

Resolved Issues

Customer Ticket Id	Details
32599	Unable to create initial admin at 1st connection to the Dashboard (when first connected to Dashboard, admin option works only for localhost).
32831	Encrypt login and password for database is not possible in 2.x Dashboards.
32860	Issue while changing a profile role from a restricted role to admin role.
32867	SAML group authentication is not working in Dashboard 2.3.0
32893	Ldap group search is failing in user configuration page.
