

PHP 1.0

This is the documentation for the CAST AIP extension **PHP 1.0**.

"Official" CAST AIP Extensions are provided by CAST and are installed on top of CAST AIP to provide support for specific technologies (analysis /measurement/discovery) that are not supported "out-of-the-box" by CAST AIP. These "official" extensions have their own product life-cycle for development, testing and shipping, which is independent from CAST AIP. Please also see [Extensions - an introduction](#) for more information.
