

C and Cpp - Required third-party software

To successfully deliver and analyze C and Cpp technologies, the following third-party software is required:

Install on workstation running the DMT (for extraction)	Install on workstation running CMS (for analysis)
<p>Nothing required</p> <div data-bbox="139 359 750 445" style="border: 1px solid #ccc; padding: 5px;"><p> Note that no project discoverer exists for Visual Studio 6.0, however, source code can still be packaged.</p></div>	<p>Software required</p> <p>If you intend to use the CAST - VC++ XXX - Mandatory Part Environment Profile (usage is recommended), then you MUST install:</p> <ul style="list-style-type: none">• All include files of third party libraries that are used.• The appropriate IDE depending on source code to be analyzed:<ul style="list-style-type: none">• Visual Studio 6.0• Visual Studio .NET 2003• Visual Studio 2005• Visual Studio 2008• Visual Studio 2010• Visual Studio 2012 <div data-bbox="776 636 1484 722" style="border: 1px solid #ffc107; padding: 5px;"><p> Note that if you do not install the appropriate IDE for your source code, then the analysis will fail.</p></div> <div data-bbox="776 745 1484 831" style="border: 1px solid #ccc; padding: 5px;"><p> Note that the above information does not apply to other source code (C/C++ compiler from vendors other than Microsoft).</p></div>
