

CMS - Clean up Analysis Units

Clean up Analysis Units

This option will remove all inactive [Analysis Units](#) and associated projects from the parent [Application](#). You can access the option by:

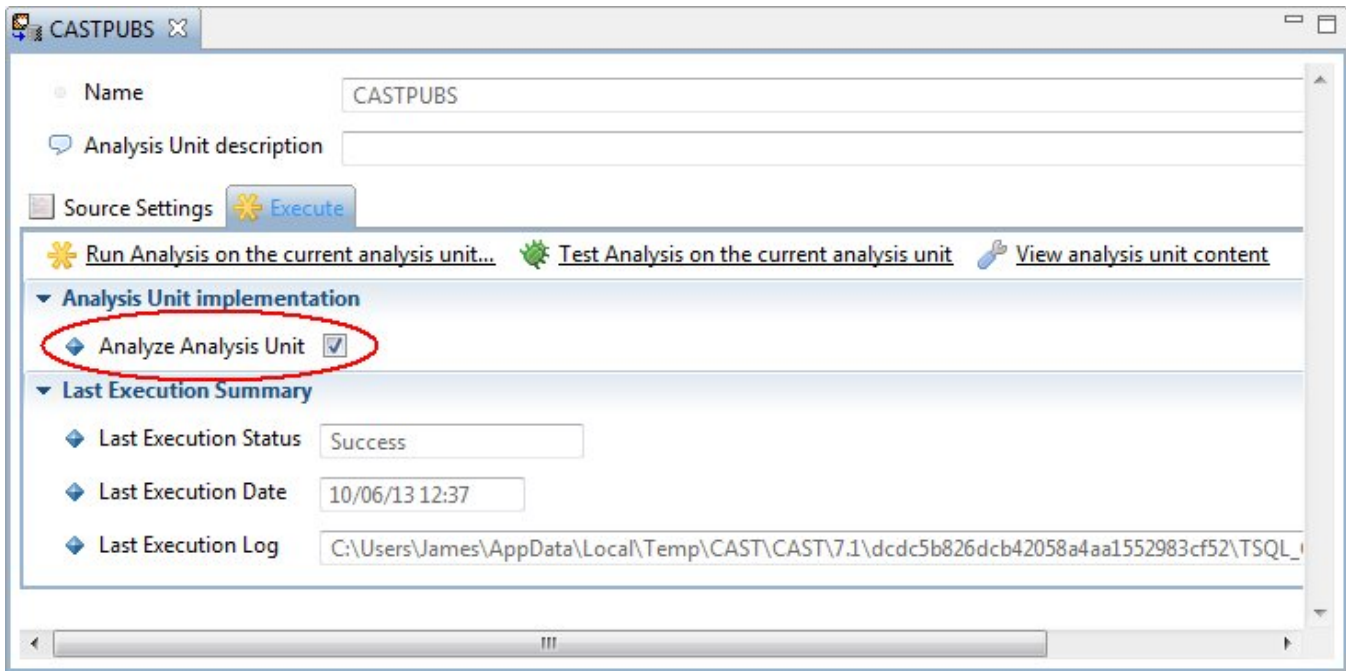

- Selecting the **Clean up Analysis Units** option from the [Current Version](#) tab in the [Application editor](#):

- Right clicking the associated [Application](#) in the [Application editor](#) and selecting **Current Version > Clean up Analysis Units** option
- In the [Command Line Interface \(CLI\)](#).

Which Analysis Units will be removed?

Analysis Units that will be removed by this action are those in which the **Analyze Analysis Unit** option has been unchecked. You can find out more about this option in the [Analysis Unit editor](#):

Results

When the option is executed, any inactive Analysis Units will be removed from the parent [Application](#):
